Wireframe Documentation

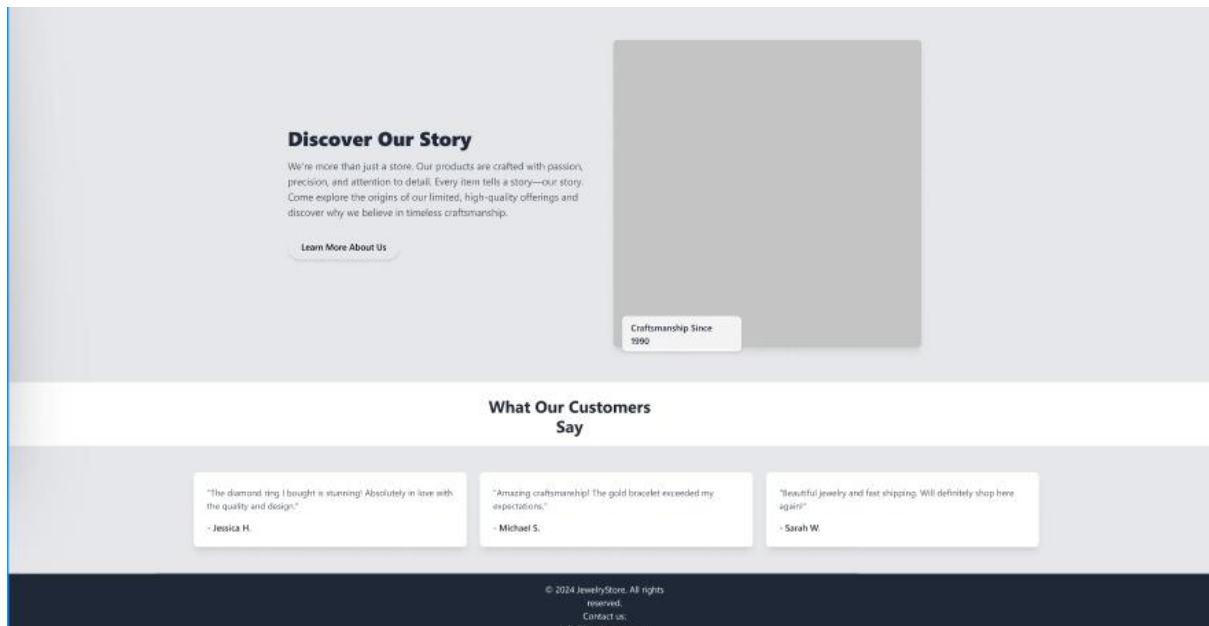

Homepage

The Homepage of the Cart Management Web Application is divided into five key sections:

- 1. **Header:** This includes navigation links, a login logo, and serves as the primary tool for navigating between different pages.
- 2. **Banner:** A visually appealing section that highlights the theme of the application and creates a welcoming first impression.
- 3. **Product Cards:** These display details about jewelry, including product images, names, and prices, allowing users to explore the available items effortlessly.
- 4. **Top-Rated List:** A curated section showcasing highly rated jewelry items to help users discover popular choices.

5. **Our Story:** A section providing insights into how the company was founded and its journey of growth, giving users a glimpse of the brand's values and vision.
6. **Customer Feedback:** A dedicated section displaying reviews and feedback from customers, building trust and improving the shopping experience.

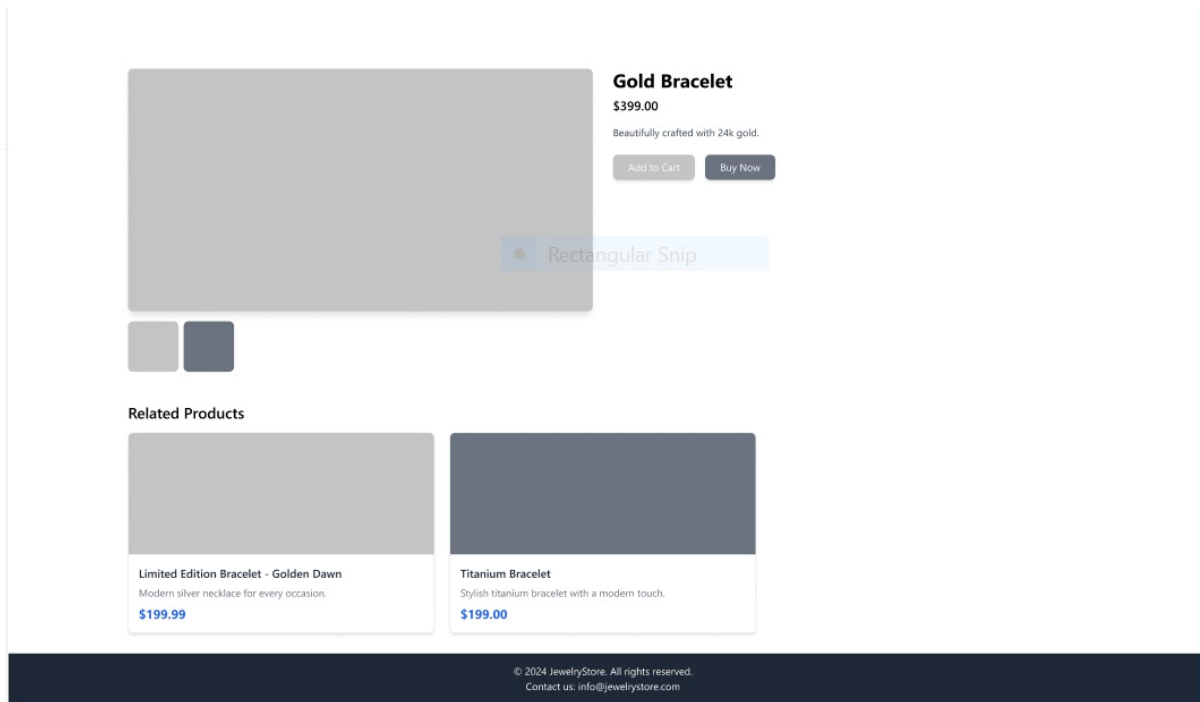

Shop Page

The Shop Page of the Cart Management Web Application is designed to provide a comprehensive overview of all shops listed on the platform:

1. **Shop Listings:** The page displays a collection of shop cards, each representing a shop with details such as the shop's name, logo, and a brief description.
2. **Shop Details:** When a user clicks on a shop card, they are redirected to a dedicated page that provides:
 - A list of all products available in that shop.
 - Detailed product information, including images, names, descriptions, and prices.
 - A filtering or sorting option (if applicable) to help users find products easily.

This setup ensures users can explore shops efficiently and make informed purchasing decisions.

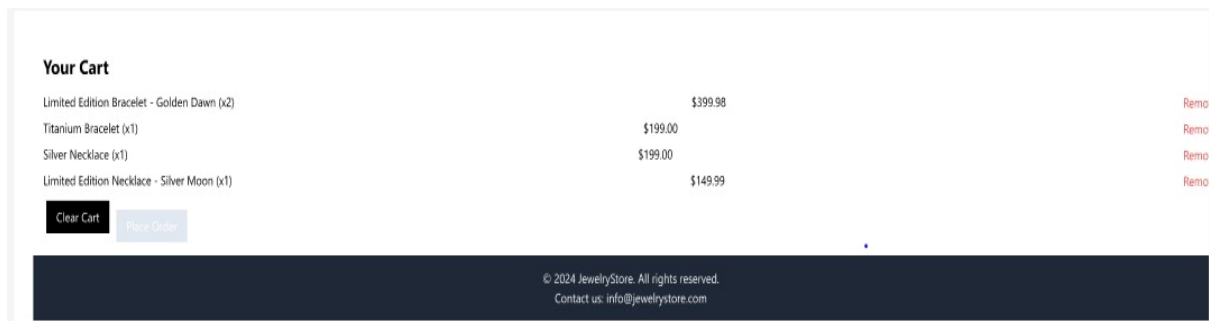

Cart Page

The Cart Page of the Cart Management Web Application provides users with an organized and interactive view of their selected products:

1. **Cart Items List:** Displays all the products the user has added to the cart, including:
 - Product image, name, and price.
 - Quantity selector to adjust the quantity of each product.
2. **Modify Cart Options:**
 - **Remove Item:** Users can remove individual products from the cart with a dedicated button.
 - **Update Quantity:** A feature that allows users to increase or decrease the quantity of a product, with real-time updates to the total cost.
3. **Order Summary:**
 - A section that dynamically calculates and displays the total cost of all products in the cart, factoring in the selected quantities.
 - A breakdown of costs (e.g., subtotal, tax, shipping if applicable).
4. **Place Order:**
 - A prominent button to proceed to the checkout process and place an order.

This page ensures a seamless shopping experience by allowing users to review, modify, and finalize their purchases efficiently

Login Page

The Login Page of the Cart Management Web Application serves as a gateway for user authentication and registration:

1. Login Section:

- Provides fields for existing users to enter their **Email ID** and **Password** for authentication.
- Includes a **Login Button** to submit credentials and access their account.
- Displays an error message if the entered credentials are incorrect.

2. Register Section:

- Offers a **Sign-Up Option** for new users who are not yet registered on the website.
- Redirects to a registration page or modal where users can provide necessary details like Email ID, Password, and other optional profile information to create a new account.

3. Additional Features:

- A "Forgot Password?" link to help users recover their accounts if they've forgotten their login details.
- Basic validation to ensure correct input formats for Email ID and Password.

This page ensures secure and user-friendly access for both new and returning users.
